Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (vND) in chickens in Los Angeles and San Bernardino Counties.

- CDFA and the U.S. Department of Agriculture (USDA) have scaled up their response to this incident, as more cases have been detected.
- CDFA confirmed that there are no commercial premises currently involved.
- CDFA confirmed that there is no public health risk due to this virus.
- 1 AmeriCorps San Diego and 1 San Bernardino County volunteer Spanish language interpreter responded to conduct surveillance (education/outreach), with two more arriving on 06/04/18.
- The USDA National Incident Management Team (IMT) arrived on 06/01/18 and are teamed up with CDFA personnel at the CDFA Ontario District Office. Each section is being briefed by CDFA personnel.

Activations

- San Bernardino Operational Area (OA) Emergency Operations Center (EOC) is activated to Level 3 (lowest level) and will continue to monitor the incident.

Deployments

- 1 Cal OES Science and Technology Advisor deployed on 05/29/18 until 06/01/18 to the CDFA/USDA ICP as a Biosecurity Infectious Disease Subject Matter Expert with an operational period of 0700-1900 hours.
- 1 Cal OES Southern Region Senior Emergency Services Coordinator (Sr. ESC) deployed to the CDFA/USDA ICP as an AREP with an operational period of 0700-1900 hours.
- 1 Cal OES Logistics Section Chief (Log Chief) deployed to the CDFA/USDA ICP with an operational period of 0700-1900 hours.

Logistics

Per the Cal OES Southern Region AREP on 06/02/18 at 0809 hours:

- Cal OES Southern Region along with Cal OES Logistics continue to assist CDFA in identifying a facility to expand operations in the immediate area of the CDFA district office in Ontario, San Bernardino County.
 - The Agency Representative coordinated with the County and city of Ontario for possible use of a facility at the Ontario International Airport. The information was forwarded to the Logistics Chief and ICP Incident Commanders.
 - One facility will be inspected on 06/02/18 as a potential location.
 - The negotiations continue.

WEATHER SYNOPSIS BY REGION

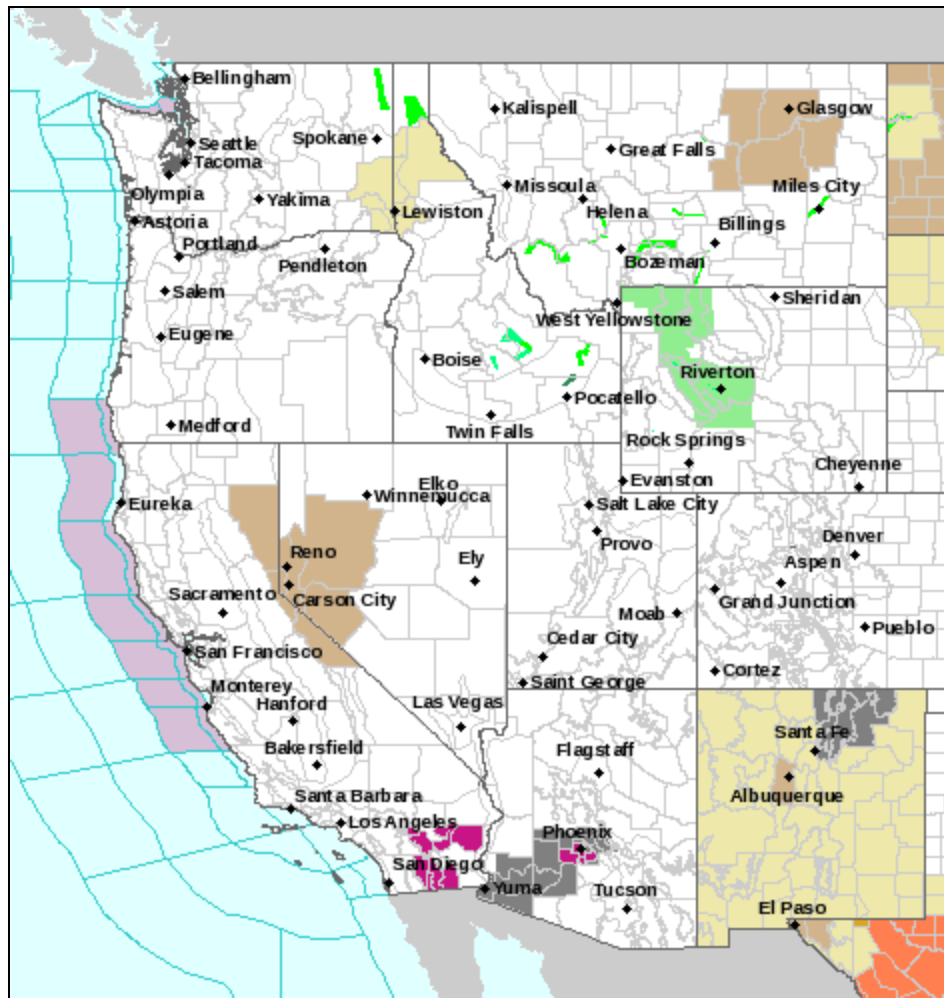

NORTHERN CALIFORNIA

A ridge of high pressure will remain over the area through Sunday. Temperatures Sunday are not expected to be much different from today's highs. The flow through the delta should increase Sunday evening as a trough of low pressure deepens along the coast. Several weak waves move through the Pacific Northwest through the middle of next week. This will bring both synoptic cooling and cooling from the delta into the valley. Temperatures will be cooling off Monday to around seasonal normals and remain near there through the middle of next week.

SOUTHERN CALIFORNIA

A ridge of high pressure over the region coupled with weak offshore flow will support fair skies and above normal temperatures this weekend, with coastal fog and low stratus hugging the coastal areas tonight. A weak trough of low pressure moving into the region mid-week will increase coverage of night and morning low clouds further inland, with temperatures cooling to near normal for most areas.
